teries." but so lar es foreigners are concerned they are few and far between. We are fortunate n the possession of a police department which unsually succeeds in sifting these matters and bringing wrongdoors to book, especially in cases of serious crime-two notable exceptions notwithstanding. When therefore, the rumour began to be circulated yesterday morning, says, the N. C. D. News, of 9th inst., that there had been a shooting affray in the Hongkow district the pravious night, the police were appealed to by Consular officials and Pressmen, but no information could be gained.

A SHANGHAI "MYSTERY!

Shanghai, like other cities, has its mys

Shortly before to a.m. a mariner named W. Bailey Paton paid a visit to the British Supreme Court offices and complained that a certain man had attempted to shoot him on Thursday night. Paton was in a state of great nervous excitement and his story was given some credence when he added that his assailant was in the custody of the police. Paton went from the British Court to the Mixed Court to inquire whether the prisoner had arrived there from the "West side" police station, but as the man he accused was an American citizen, he was dispatched to the United States Court for China. When Paton arrived at the American Consulate he was so agitated that he spoke jerks while interviewing District Attorney Bassett. At first he said that he had been sent by the police as the case was coming on for bearing in the American Court. Paton de clared that an American citizen had attempted to kill him the previous night, but when the District Attorney was proceeding to take this statement down the man protested that he did not wish to make a statement and added that he and the man in question had been friends for three years ; they had not quarrelled and he did not know why he fired at him. A minute later Paton made a very different statement. He said that he was sitting in his house No. 889 Haubury Road, at 10.40 p.m. when he heard two shots fired in the alleyway outside. He was too interested in his reading to go outside and see what was the matter! He could not say who. discharged the firearm

Inquiry at the various police offices showed that no arrest had been effected and the Consulates concerned had not issued a warrant, It would seem probable that shots were fired, but that no one was injured. There has recently been trouble in the neighbourhood of the alleged occurrence, but on this occasion the shots were doubtlessly fired into the air.

THE YUNNAN RISING.

ANTI-MONARCHIST INVASION.

Dispatches received from the South by the local mandaring report that a body of antimonarchists variously estimated at from 3,000 to 5,000, the majority of whom carry r.fles of the latest patters, crossed the Annam frontiers into Yunnan on April 28 last, in the vicinity of Hobsinien, in the prefecture of Lingar, The next day the auti-monarchists attacked, and the day following captured a number of fortified posts at Hok'ou amongst the spoils being some 2,000. In an urgent telegram to the Peking Governfirearms of the best kind and also possess a great campaign. Owing to the slender strength of THE YUNNAN ARMY

Viceroy Hai Liang bogs the Government to issue instructions calling upon the Viceroys and Governors of the provinces bordering the Yun-Kuet Viceroyalty, to send reinforcements and supplies of war without delay to assist the Yunnan tenans; failing which Hsi Liang reports that he cannot hope to resist the insurgents successfully. In response to this appeal an Imperial Rescript was at once sent by telegraph to H.E. Chang Ming-chi, Governor of Kuangsi, which adjoins Yunnan province, to send with all haste the troops under the command of Generals Lung Chi-kuang and

Lu Yung-ting to the rescue. VICEROY CENSURED.

Vicercy Hsi Liang has also received a special Imperial Edict censuring him for being thus taken unawares by the invading anti-monarchists and makes him responsible for any untoward crises that may hereafter o cur. At the same time he has been informed that the Waiwupu has sent a protest to the French Minister in Peking in that the French authorities in Annam had suffered such an irruption to start from their territory, and asking that as a remedy a strict supervision of the frontiers be made without delay in order to prevent fur her supplies f om crossing into Yunnan or Kuangsi to the aid of the anti-monarchists. Furthermore as there are numerous French subjects in the vicinity of Ho'kou and Mengize near the accor of disturbancer, Viceroy Hsi Liang has been commanded to take extra precautions for their protection.

GENERALISSIMO APPOINTED. A later dispatch states that Lu Ch'un-lin until lately Provincial Treasurer of Yunnan, has been appointed generalissimo of the Yundan Government forces with instructions to crush the insurrection at all costs. This efficie was ordered last April to vacate the Provincial Treasurership of Yunnan and go up to Feking for apprintment to another post and had already, on the 2nd instant, reached Ch'apgsha, Hunan, on his way to Peking. As instruction, had been sent ordering him to return post hast to Yunnan, he is probably aire dy half way on his return journey to take command of his army. In order to enable him to report direct to the Torone on his arrival at Yunnan, Li

Ch'un-lin has been raise I to the rank of an ex

pectant Metropolitan officer of the 3rd grave, AN IMPERIAL RESCRIPT. We translate the following Imperial Rescript received by Viceroy Hsi Liang on the 5th instant from Peking :- "The rebel Sun (Yat-(en) and his men have fine modern rifles and are well provided with funds, whilst he possesses the devotion of his fellow rebels who number over 5,000 men, and their object is

cem to be well organized. We have been informed that his followers in Yunnan nov overthrow the dynasty. These rebels therefore nust not be confused with other kinds of insurgents, whose sole ambition hitherto has been only local success. Now the treaty port of Mengize is the Areat gate-way into Yunnan once Mengize is lost the whole province will suffer disastrously. Lose no time therefore in collecting your troops to the rescue of those

now opposing the-rebels. A MOUNTAIN OUT OF A MOLE-HILL. In spite of the alarming news that has been

received by the local mandarin as given abov it may be thought, in the light of former experience, that there is an attempt in certain quarters to make a mountain out of the pfoverbial mole-hill. There was much blowing of trampets a short time ago, it will be recalled: by our readers, about the desperate figh ing between the Imperial troops and a body of anti-monarchists before the "forts" of Chennankuan on the Kuangai-Tongking frontiers. The anti-monarchists had captured the "forts" upon their invasion of Kuangsi and the troops that had been gathered together to eject the invaders tried "desperately" to do it-so the reports declared at the time. As a matter of fact the so-called "impre nable forts" at. Chennankuan were at that time neither more nor less than a few dijapidated atructures surrounded by mud walls, easily destroyed by a few shells from a modero field or mountain gun, A corres. pondent tells us there was scarcely any fighting at the "forts"; the Government; troops simply waited for the anti-monarchists to abandon the "forts"-which they had to do at last owing to lack of food supplies -and then calmly march. ed in. We trust and believe that the "doings" now in Yunnan will be a similar kind of seriocomic display. Of course, it is to the interest of those concerned to magnify things generally, for the sake of the kudos that will be attainable

They-were lodged in large that ched bandas and were divided according to sex and the various stages of the disease. In one enclosure we saw a number of infants, in whom the first outward signs of the scourge were just appearing. Unaware of their impending doom, the little black mites played and remped to their heart's content in the shade of the banana grove, and only the swelled glands at the base of their neck showed that their fate was scaled. It was sad indeed to think that, in a very short time, those merry peals of laughter would gradually become more and more rare, and that all those poor little creatures in whom the joyof life wasse strong, would, after a year or two of misery, be laid in the crowded cemetery that I could just see between

In a row of sheds, surrounded by the banana groves which supply the food for the patients. we saw numbers of those who had reached the second stage of the disease. Most of them appeared to be suffering acutely. They seemed to shun the cool sh de of the broad thatched roofs, and to prefer to sit or lie in the full blaze of the noonday sun. Even there many of them shivered almost constantly, and drew about their emaciated limbs the brown rags of barkcloth which pirtly covered them. The drawn features and haggard eyes testified to the gnawing pains that almost constantly afflict them, and the unhappy creatures appeared to have special dread of being touched. Many of them were in the peculiar state of lethargy which has, doubtless, been responsible for the mislerding name by which the disease has become commonly known. Unfortunately, sound sleep rarely comes to the relief of the doomed ones, and the torpor in which they lie comes from the constant strain of never ceasing pain. Many of them, in an unguarded moment, put an end to their miserable lives, and i'

is a wonder that more of them do not do like wire. It is estimated that over 20,000 sick now remain to be dealt with, and they are being MOTOR LAUNCHES located in large camps capable of accommodating about 1,000 at a time. Though the Lords of the Imperial Treasury, upon whom the administration of Uganda still has to depend to a certain extent, have authorised the expenditure of a considerable sum on the measures now proposed, everything has to bedone on the most economical scale. Most of ibe unfortunate inmates of the camps are on very short commons; and those who have neither friends nor relations get nothing but modicum of bananas and beans. Their intense craving for meal will have to go unsatisfied, and the misery of their remaining days will have but few alleviations. A taste of teef or mutton now and then would, to there poor creatures, be an intense joy, and it is in the hope of obtaining from some of your seaders the means of procuring this for the efficted ones that I venture to enlist your powerful help."

THE TRUTH ALWAYS.

Untimations.

"When you are in doubt tell the truth." was an experienced old diplomat who said this to a beginner in the work. It may pass in some things, but not in business. Fraud and deceplibn are often profitable so long as concealed; yet detection is certain sooner or later; then comes the smash-up and the punishment. The best and safest way is to tell the truth all the time. Thus you make friends that stick by you, and a reputation that is always worth twenty shillings to the pound everywhere your goods are offered for sale. We are able modestly to affirm, that it is on this basis that the worldwide popularity of

WAMPOLE'S PREPARATION rests. The people have discovered that this medicine is exactly what it is said to be, an that it does what we have always declared will do. Its nature also has been frankly made known. It is palatable as honey and contains. all the nutritive and curative properties of Pure Cod Liver Oil, extracted by us from fresh cod. livers, combined with the Compound Syrup of Hypophosphites, and the Extracts of Malt and Wild Cherry. A combination of supreme excellence and medicinal merit. Nothing has been so successful in Anemia, Scrofula, Bronchitis, Influenza, Loss of Flesh and Wasting Diseases, Weakness and Low Nervous Tone, and all complain's caused by Impure Blood. Dr. Austin D. Irvine, of Canada, says: have used it in cases where cod liver oil was indicated but could not be taken by the patient, and the results following were very gratifying." It is effective from the first done. and agrees with the most sensitive and nervous stomachs. It cannot deceive or disappoint you, and comes to the rescue of those who have received no benefit from any other treatment. It stands for the medicinal triumphs of the age. "Watch carefully against imitations." Sold by chemists throughout the world.

WORK AT THE POST OFFICE.

A favourite diversion of our contemporaries in Shanghai and Singapore when there is a temporary dearth of local news is to indulge in diatribes on the alleged delinquencies of the Hongkong Post Office. Even Manila newspapers have become infected with the virus of abuse when a steamer from Hongkong fails to achieve impossible feats. But if they were to consider for a moment the vast and complicated service which has to be operated at racing speed by the official staff at Hongkong and the general inadequacy of the accommodation provided for the clerks and sorters they might be less inclined to let loose the vials of their wrath The postal service at Shanghai, for example, is not such a pattern of excellence as one might expect, that is, if the system in force there is to be regarded as the standard at which Hongkong should seek to attain, for it frequently happens that a week passes without a single mail coming from the Northern port, although haif a dozen vessels arrive at !!ongkong direct from Shanghai the meantime. The result is that when a week's mails arrive together the work of the Hongkong Post Office is wrought up to the pitch of dislocation, winte business houses are almost over whelmed by the abnormal mail deliveries. Taking everything into consideration the service of the Hongkong Post Office, while not beyond reproach by any means, is decidedly efficient-a fact which may be attributed rather to the rank and file than the higher officials. The higher officials are so continually changing their positions, that it is obvious the real intelligence of the Department dwells in the lower strata. Last year the Postmaster General was away for nine months, the Superintendent of the Registration Department was on leave for six months, the Assistant Postmaster General returned in the first month of the year after a long furlough-which meant that he had to get into the swing of the systems again -- and the Accountant returned luskebruary. Then for four months one cadet was at the head of the office. while for six months the gentleman who mane the report of the Department for 1907

Mr. C. McI. Messer, was acting as Post thoughtful individuals who remit a portion out to such millionaires as may consider " Although exchange tuled high during the ed, while, on the other hand, the payment \$22,877 in 1907 against \$12,728 and \$15,467 change of money orders with Macao, hither. | energy and intelligence required to carry to between Hongkong and Macao only, has been extended to all the British agencies established in China. Direct exchange with Kiautschou also came into force in 1907." Mr. Messer remarks that, "A system of advice of payment of money order, to be furnished to the remitter by the paying office. at a fee of ien cents for each order was in-

troduced, but the public has not availed

public generally know anything about this

innovation? We rather fancy they never

heard of it, or, tif they did, they have long

since forgotten all about it. There are many,

we leel sure, who would gladly take advant-

age of this reform if it were brought to

their attention when they are purchasing

the orders. Then again, on the same lines,

we read that "on 1st December a new sys-

tem inaugurated by the Post Office of the

traits Settlements was introduced for the

purpose of providing illiterate coolies with a

means of taking their savings back to China

by means of money orders payable to bearer

without any question being raised as to

identification. As up to date only \$150 has

been sent, this system does not appear to

find favour." Again the question arises, is

any attempt made to popularise the system

by bringing it to the knowledge of the coolies?

One innovation which is certainly worthy of

approbation is that in connection with the

despatch of money orders to the United

Kingdom. It may be best described in the

words of Mr. Messer: "With a view

to expediting the payment of money or-

ders in the United Kingdom a new sys-

introduced. Instead of forwarding all the

advices together with the money order list

to the exchange office of London for on-

ward transmission to the paying office, these

documents, after being certified, are sent

direct from Hongkong to their respective

offices of payment under separate covers.

This arrangement has been found to possess

considerable advantage over that previously

ly been effected a day and sometimes two

days carlier than could possibly have been

the case under the old system." No doubt.

the new system entails an immense amount

of suditional labour on the staff but its

manifold advantages are manifest, and those

Nothing can exceed the ingenuity of the real, bona-fide American whep he is resolved to become a celebrity at all hazards. matters very little in which direction his genius develops itself, so long as its fruition calls attention to his existence as an active itself of this innovation." But does the i entity. Representative de Armond of Missouri-the place where doubting Thomas is believed to have hailed from-appears to be one of those characters who if he cannot makea noise in the world by Bryanic methods is certain to become famous as the originator of a scheme which should appeal to every good, sound, democratic American. It has long been a known fact that the average American has a sneaking regard for a nobleman, much in the same way as every Englishman is supposed to love a lord. The plutocrat hands out his daughters wholesale to the cast-off nobility of Continental Europe, and there is a goodly sprinkling of the American girl at the Court of St. James. But, after all, the supply of dukes, princes, counts and marquesses is strictly limited and the demand is far in excess of the article required. "There are even noblemen in effete Europe who do not pant for America's daughters-with their ducats as the prime attraction-but actually would consider a marriage with a commoner as a meskiliance. If Mr. de Armond's plan is adopted there need be no more hunting after' crowns and coronets outside the borders of "God's own country." In fact, it is a standing disgrace tem of dealing with the advices has been, that American politicians have failed to do their duty in the past by the creation of an order of knighthood reaching up to grand dukes. It is true that America boasts of one "Princess" in the person of the peerless Allcent representatives of the Russian Army and Navy but she has most unaccountably dropped out of the public geze within recent months. What de Armond's proposal to remedy this

state of affaire is may be told in a few

words. Starting with the assertion that the

exchequer of the United States far too

THE JAPANESKI BOYCOTT. AN AMERICAN VIEW

The Chinese persist in their determination to get even with Japan for the indignity put upon them by the Japanese in the Tatsu Maru case. The Chinese Merchants' Guild has decided to cable their agents at Japanese ports not to place any more orders for Japanese goods, and to ship the grods already ordered in vessels other than Japanese. As China is Japan's second best customer, the situation created may prove scrious. The Japanese have plainly intimated already that they will submit to no discrimination, but it is not quite clear how a people can be forced to buy against their will. Stills are usually found in abundance, and there is a transfer of Wong Chung ho to Yunnan strong probability that the pushing of the boycott too far might bring about a result which to assist in putting down the rebelthe patriotic Chinese are not looking for .- San Francisco Chronicle.

PROPOSAL FOR RE-ORGANIZING.

Writing under da'e 5th inst., the Peking correspondent of the N. C. D. News says:-The Ministry of Agriculture, industry and Commerce has sent in an important memorial on the need for reorganizing Chinese weights and measures. The following are the chief points of the document :--

z.-The existing Chinese Government foot will be used in future for building houses, etc., (Ying-tsan-chih.)

2,-The Tsao tou weights for weighing tribute rice will be used for weighing purpose. 3.—The Ku-ping measure will be used for

monetary purposes. 4.—All the metrop liten and Provincial Yamens must abolish the old weights and measures within three months after new ones have been received from the Ministry of Agriculture. If any of the yamens are prevented from using the new weights and measures within the fixed period for any reason, the officials responsible for their adoption must remove such obstacles within the period of two

5.-After the introduction of the new weights and measures, all descriptions of people must use them within the period of ten years, during which time the use of old weights and measures must be discontinued.

6-In future the fixed weight of one catty is sixteen ounces instead of fourteen, or fifteen according to the practice of different parts of the Chinese Empiré.

y.-The Ministry will establish a factory in Peking for the manufacture of new weights and measures upon uniform system.

8 .- A special office will be opened in the metropolis with a branch in each of the various provincial capitals to have charge of all affairs concerning the new weights and measures.

g .-- The weights and measures now in use by the various maritime and native customs may continue to be used provided that the proportion to the new scale is carefully

established. 10 .- The new weights and measures will be first introduced into provincial capitals, and afterwards extended to all the prefectural districts and departmental cities and towns and

11.- Upon receipt of the Imperial sanction officials are to be sent to all provinces to report upon the effect of the change for the Ministry's

information and evidence. 12,-As the English, French and other foreign weights and measures are used for weighing and measuring articles at the various treaty ports of China, the Ministry will make out their exact equivilents for use.

13.-The new weights and measures will be printed on all descriptions of Chinese readers and other books for the use of Government and private schools and colleges in China. 14,-One office will be established in each

province for the sale of the new weights and measures at a fixed price, which is to be decided by the Chinese Government.

15.-In measuring land five feet will make

one pace. This memorial is now in the hands of the I tries. office for the discussion of State affairs.

THE Ministry of War at Peking has received a report to the effect that a Chinese revolutionist has purchased from a Japanese firm 1,800 rifles through a certain expectant. A WILD RONAWAY

EXCITING SCENE AT BAST POINT,

Wanchai was the scene of a most exciting runaway last evening. A big China" pony drawing one of those clumsy-looking gharries tore down the Wong-nei-chong Road like cavalry charger and was not brought up until Southerners in the lower of the Kwang Proit had reached the Praya East, after several pedestrians had had narrow escapes of being trampled on.

The Chinese driver was thrown down and painfully injured. In addition to severe bruises he is believed to have dislocated his shoulder. Yesterday afternoon a number of Chinese gentlemen, with their lady friend, engaged the gharry and ordered the driver to drive them to the Happy Retreat. The pony, a grey one, was formerly used for racing purposes, and seemed to be in good sp'rits as he trotted eastwards. When the Happy Fetreat was reached the party left the carriage, giving orders

to the driver to w it for them. As soon as they had departed the driver stepped down from his box, wa ked up to the pony's side to' adjust the reirs, and then proceeded to light a cigarette, In so doing the box of matches exploded in his hand. The driver shouted, and the pany, having its bead turned in his direction at that moment, lost its temper. He kicked and wheeled about ina pervous fashion and then started out in the direction of Vonc-nei-chong village. The driver was knocked down on the spot, receiving

certain injuries to his shoulder. The gharry was very near coming to grief as the puny crossed the bridge, and headed slong gengower Club matched, the pony veered the left, dashed across the Bowrington Canalbridge, along Merrison Hill Road, up Wanchai Road, then isto the Praya East. YARN MARKET.

In their report dated 15th instant, Messes. Phirotsha P. Petit & Co write:-Our last circular was dated the 1st inst.

The feature of the fortnight has been one of firmness, and the continued fa'l in Rupee exchange is responsible, in a measure, for the rise in prices of from \$1 'o \$1 per bile, which, however, does not equalise the difference to importers when the dollar quotations are reduced to their equival nts in Bomby currency

Demand from the consuming districts has been satisfactory and the bau placed upon cheap cotton fabrics of the Japanese by the vinces has induced purchases of Indian yarn for the interior which will be made use of toproduce home spun articles to replace the

poycotted Japanese cloth. If silver exchange continues its downward grade, prices, which must be put up in local currency in order to meet Rupes quotations, may he rendered probibitive to native deal :rs who will, in that case, be compelled to come into the market for coarser and cheaper threads in order to meet their immediate requirements. Sales between dealers may not improbably also take place since speculators, who had bought when exchange ruled high, can easily torn over their settlements with present high prices ruling at handsome profit.

women and three men-were arrested on board the steamer Ainchiku Maru, which reached port last evening, from Japan. The stowaways, who boarded the vessel at Moli. were found by Detective Bergeant Wilden, of the Water Police Station, hiding between the keelson and the lower bold. In consequence of certain information received three of the crew, all Chinese, were apprehended as aiders and abettors. At the Police Court, this morning they were arraigned before Mr. J.R. Wood, when the three male stowaways were fined

\$500 each, the women \$50, and the three aiders and abettors \$ 5 each. It is difficult to understand why the siders and abstrors were treated so lemiently, as compared with the stowsways, when it is considered that without their conn vance and assistance the Japanese Could not bave succeeded in reaching this port . A WONDERFUL DISCOVERY. This is the age of resea, change aperiment, when all nature so to speak, is range ked by the scientific for the comfort and happiness of man. So lens a has indeed made giants strides during the past century, and among the—by no means least infortant—discoveries in medicine comes that of THERAPION.

This preparation is unquestionably one of the most genuine and reliable Patent Medicines ever intro genuine and reliable Patent Medicines ever intro-duced, and has, we understand, been used in the Continental Hospitals by Ricord, Rostan Jobert, Velpeau, Malsonneuve, the well-known Chassaig-nac, and indeed by all who are regarded as author-rities in such matters, including the celebrated I-tilemand, and Roux, by whom it was some time since uniformly adopted, and that it is worthy the aftention of those who require such a remedy we toick there is no doubt. From the time of Aristotic downwards, a potent agent in the removal of downwards, a potent agent in the removal of these diseases has (like the famed philosopher's atone) been the object of search of some hopeful, generous minds; and far beyond the mere power—if such could ever have been discovered—of transmuting the baser metals into gold is surely the discovery of a remedy so potent as to replenish the failing energies of the confirmed road in the one case, and in the other so effectually, speedily and safely to expet from the system without the aid, or even the knowledge, of a second party, the polaous of acquired or inherited disease in all their protean forms as to leave no taint or trace behind. Such is

THE NEW PRENCH REMEDY THERAPION with if not take pacer-

which may certainly rank with, if not take piecedence of, many of the discoveries of our day, about
which no little ostentation and noise have been
made, and the extension and ever-increasing demand that has been created for this medicins wherever introduced appears to prove that it is destiered to cast into oblivion all those questionable
remedies that were formerly the sole relience of
medical men. Therapion may be o take of the

HOMAN HAIR MARKET.

An item of increasing importance in the trade statistics of Japan is the traffic in human hair. The value of the expects of this "commodity" rose from £280 in '904 to £10,421 in the first eleven months of 1907. France appears to be he best foreign customer, for in 1907 she took 115,710lb. of it, valued at £5,528, while 38,253lbs., worth _£2,553, went to the United States. The hair is all black and rather coarse, coming almost entirely from women of the lower classes. It is collected in the spring and autump, the best quality coming from the women of Izu, who are blessed with locks of extraordinary length. After being combed and cleansed by means of sand, the harvest thus gathered is sorted in bundles ready for the demand.
